Dr. Alicia Shaw,
Elementary Principal
Ms. Jacque Crafton,
Secretary to Superintendent

Dear Parent/Guardian,

The Gideon School District uses a number of online resources to help expand the educational opportunities for your child. The user data that is collected for several of those sites is under the direct control of the Gideon School District, although some sites require separate user registrations. In all cases, we strive to minimize the individually identifiable student information that is utilized for site registration purposes. While federal law does not necessarily require us to notify you of user data we maintain, we still wanted you to be aware of the applications that we currently use, provide access to, or intend to use on a regular basis. Since some of these applications require separate user registration and because some of the applications will be used by children under the age of 13, this letter is intended to provide you notification of our educational use of those sites/applications. Other applications may be used on an infrequent basis and individual classrooms and groups of classrooms may use applications in addition to the ones listed below. The district may modify this list as needs warrant. The district may act as surrogate on behalf of the student for selected applications. The list below is not intended to be exclusive but to indicate the most commonly utilized applications.

WeBSIS Student Information Portal
Google Apps
Discovery Education online services
Atomic Learning
iTunes U
Evernote
Box

EDU 2.0 Learning Management System
Destiny Quest
My Big Campus
SchoolTube
Dropbox
Flipboard

Furthermore, your child may register for other optional or suggested educational sites and applications throughout the school year. We always encourage students to make sure their parents are aware of any Internet sites they register for or use for any purpose.

Please contact the appropriate building office at any time regarding privacy questions or concerns related to the use of district online educational applications or to review any personally identifiable information that is collected or utilized as part district controlled applications. Upon request, the district will also provide parents with login information for their child(ren) for any district maintained online applications. Not all of the applications listed above are fully district maintained.
